Clear doors without heater wiring

THERMGLASS VIG keeps the glass surface above the dew point, so anti-sweat heaters can be reduced or removed from cooler and freezer doors.

Calculate door savings Request samples

Fog-free	Less heat	U 0.46
at [store °F / % RH] tested condition	anti-sweat heaters reduced or removed	W/m²K center-of-glass

Condensation performance tested with the case at [°F] and the store at [°F / % RH]. Heater reduction depends on door design and store conditions. See the test report in Resources.
